

**POSTER TITLE****PRESENTER**

<b>P01</b>	Hydroconversion of sunflower oil for the production of sustainable aviation fuels	Leonardo Ferreira
<b>P02</b>	Guaiacol hydrodeoxygenation over Ru-based catalysts	Laura Esteves
<b>P03</b>	Catalytic oxidation of dilute methane streams over palladium-based Catalysts	Renata Pacheco
<b>P04</b>	Engineering In <sub>2</sub> O <sub>3</sub> -Carbon Interfaces for CO <sub>2</sub> -to-methanol conversion	A. Sofia G. G. Santos
<b>P05</b>	Caracterização por GCxGC-ToFMS de matérias-primas e produtos hidrotratadas em processos catalíticos HEFA/HVO	André Shimura
<b>P06</b>	Shrimp shell-derived Ru/N-doped biochars for heterogeneous catalysis	Andreia F. Peixoto
<b>P07</b>	Catalytic valorization of CO <sub>2</sub> with biochar-derived materials	Rui M. B. Carrilho
<b>P08</b>	Bifunctional catalysts based on supported ZnAl-LDHs in the green synthesis of N-heterocycles. Mechanistic considerations	Elena Pérez-Mayoral
<b>P09</b>	Comparative evaluation of adsorption, photocatalysis, catalytic ozonation and photocatalytic ozonation for diclofenac removal using SrTiO <sub>3</sub>	Daniele Moreira
<b>P10</b>	Catalytic ozonation of a mixture of pharmaceuticals: effect of N and O functionalization on the surface chemistry of activated carbons	Olivia Salomé G. P. Soares
<b>P11</b>	An eco-friendly sonogashira coupling reaction of heteroaryl halides with eucalyptol in the presence of Pd@zeolite	Pier Parpot
<b>P12</b>	Fenton-type reaction for water treatment using heterogeneous catalysts based in (rare-earth elements/iron)-zeolites	Isabel C. Neves
<b>P13</b>	Catalytic conversion of biomass-derived sugars to furfural	Lucília S. Ribeiro
<b>P14</b>	From waste to catalyst: ZSM-5 prepared from coal fly ash & rice husk ash for pollutant degradation through Fenton reactions	Angela Martins
<b>P15</b>	Methoxylation of terpenes over PVA composite catalysts	José Eduardo Castanheiro
<b>P16</b>	Wood fiber supported iron complex for the removal of organic dyes from water: adsorption and (photo)catalytic degradation	Mário M. Q. Simões

**POSTER TITLE****PRESENTER**

<b>P17</b>	A novel CNT-based catalytic system immobilized on glass frits for efficient oxalic acid degradation	Marcela P. Spaolonzi
<b>P18</b>	Molybdenum oxide-phenanthroline hybrid catalyst for biobased limonene valorization	Anabela A. Valente
<b>P19</b>	Optimisation of zirconium-pillared clay synthesis for large-scale CO <sub>2</sub> capture	Tânia Frade
<b>P20</b>	Ionic liquid-zeolite hybrid systems for CO <sub>2</sub> capture and catalytic conversion	Diana Marques
<b>P21</b>	3D-printed activated carbon monoliths for gas separation	Rui P. P. L. Ribeiro
<b>P22</b>	Sustainable materials for adsorption of phenol, naphthalene, and toluene from liquid phase	Vicente Lopes
<b>P23</b>	Production of porous materials from coffee biomass waste for the removal of emerging water contaminants	Inês Matos
<b>P24</b>	Biomass-activated carbons in the removal of crystal violet	Pedro Francisco Geraldo
<b>P25</b>	Hexane isomer separation by adsorption: a challenge still worth tackling	João Pires
<b>P26</b>	Development of stable catalysts for efficient biogas dry reforming towards renewable hydrogen production	Livia Valle
<b>P27</b>	Biochar, fertilizers, and trace metal interactions effects on cadmium accumulation in cacao beans: long-term field study	Manuel G. Velasquez Ramirez
<b>P28</b>	Cation-exchanged cryptomelane/activated carbon composites for aqueous supercapacitors	Raquel P. Rocha
<b>P29</b>	CO <sub>2</sub> valorisation into cyclic carbonates: screening of metal-carbon based catalysts	Gabriela P. Queirós
<b>P30</b>	Glyphosate removal in the presence of carbon-based materials	Carla A. Orge
<b>P31</b>	Valorization of invasive seaweed biomass as porous carbons for the recovery of rare earth elements from Aqueous Solutions	Maria Manuel Bernardo
<b>P32</b>	Catalytic conversion of plastic waste via pyrolysis: composition and characterization	Fábio M. S. Rodrigues

**POSTER TITLE****PRESENTER**

<b>P33</b>	From flow synthesis to application: scalable BODIPY photosensitizers for antimicrobial and photocatalytic processes	Mário J. F. Calvete
<b>P34</b>	Photocatalytic materials for light-activated antimicrobial endotracheal tubes	Maria M. Pereira
<b>P35</b>	Ruthenium-modified aurivillius $\text{Bi}_2\text{MoO}_6$ photocatalyst for sustainable ammonia production	Amala Joy
<b>P36</b>	Molecularly imprinted photocatalytic hybrids from hydrochars	Ana S. Mestre
<b>P37</b>	Simultaneous effects of key thermochemical parameters on waste-based adsorbent synthesis and pharmaceuticals removal	Eugénio Clemente
<b>P38</b>	Exploring brown seaweeds as precursors of carbon materials for environmental applications	Juliana Gaspar
<b>P39</b>	Valorization of brewer spent grain: carbonized materials versus activated carbons for industrial dye removal	Beatriz M. Rodrigues
<b>P40</b>	Integrated valorization of food waste residues as catalytic supports and feedstocks for bio-based chemicals and fuels	Manuel F. R. Pereira
<b>P41</b>	CCU-tailor: a software for tailored design and optimisation of industrial processes	Daniel R. Sousa
<b>P42</b>	Indirect DME synthesis modeling for Carbon Dioxide Utilisation	Christina Chkeir
<b>P43</b>	Towards tailoring carbon utilization: optimizing conversion routes in process design	Rita Rocha
<b>P44</b>	From text to action graphs: structuring catalysis synthesis data for machine learning	Yusra Hamid
<b>P45</b>	Study of diffusion in catalytic PLA production using molecular dynamics simulation	Mariana Moreira
<b>P46</b>	Hidden structure in heterogeneous biochar data: from weak global correlations to regime-dependent relationships	Adriano Silva
